Software Engineer, Full Stack Web (Remote - US)

Department: Engineering

Location: Remote

Our Web Team is seeking a Full Stack Engineer to build intuitive, scalable, and easy-to-use web applications. This position is remote and can be performed from anywhere in the US.

Responsibilities

- Design and implement full-stack web features in Python and JavaScript.

Qualifications

- You have a BS or MS in Computer Science.
- You have 5-10 years of experience working as a software engineer and building web applications with HTML, CSS, and JavaScript in a professional setting, particularly using the React framework.
- You have experience with server-side technologies, such as Python/Django.
- You have experience with cloud platform technologies, especially AWS.
